

Risk Management | SambaSafety Partnership

Where innovation meets experience to solve your risk management needs. Intact Insurance Specialty Solutions has partnered with SambaSafety, a leading provider of motor violation records and driver risk solutions to help you make your operations safer. As a client of Intact Insurance, you will receive preferred pricing from SambaSafety.

SambaSafety’s Qorta platform offers the industry’s most comprehensive driver risk management solution, helping companies lower cost and reduce administrative burden, all while ensuring only the safest individuals are driving on behalf of your company.

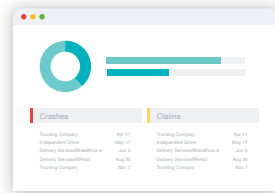

Bring simplicity to the way your company manages driver risk with our Professional package, including continuous driver monitoring, driver analytics, crash and claims management and enterprise-level convenience.

Never miss a violation

Receive near real-time automated alerts when an employee receives a negative violation on or off the clock, such as a speeding ticket, crash, suspended license or DUI. Convenient reporting tools categorize drivers, ranging from clean to high-risk, helping you take action before costing your company money.

Simplify crash & claims data

Get the full picture of your drivers by managing crashes involving police as well as those that don't (e.g., parking lot fender benders) in one location. Simply upload crash and claims into the platform and create custom scores for those incidents based on what's important to your organization.

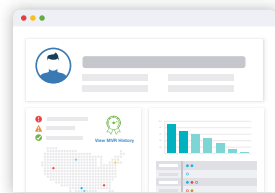

Digitize your driver safety policy

Enforce your safety policy with ease through customizable policy scores that combine motor vehicle record (MVR) scores and crash and claims scores. You're empowered to quickly identify employees who fall outside of your safety policy, keeping unsafe drivers off the roads.

Get enterprise-level convenience

Seamless software integration through our API and single sign-on capabilities reduce administrative burden traditionally associated with large-scale risk management.

Make informed decisions

Utilize the driver performance dashboard to understand what negative driving behaviors are occurring, how frequently they happen and how your company compares to peers to make impactful enhancements to your overall safety program.
